Thanks.

Chris responded and he is amending the SRO approval form for the increase.

I want you all to miss me when I retire. ☺

Mike, I think I can amend even though it is with Cora awaiting SRO approval.

Chris, please let me know that you can amend the SRO approval form to up the ceiling as I believe it has been signed by Pam and sent to the SRO.

Subject: RE: Chaparral Energy Spill - Alva, OK

Hi Linda:

I know the TDD for the Chaparral Energy spill has not yet been approved.... however, because of significant RP problems (not capable of initially responding) we have had to spend more time at this response. Jon Rinehart was good enough to put the TDD together for me from the office (I have no cell or internet service way out here) but, I need to add more money to the TDD already.... I want to add \$10,000 to bring the ceiling to \$20,000.

I know I can't amend the TDD in EAS until the initial TDD has been approved so, once again this makes things tough. I can't take the chance of exceeding the current \$10K ceiling so, I will plan to demobilize my one START person tomorrow. I will stay on site until Friday (hopefully no longer). I will still need further START support for follow up inspections as well as report writing, etc.

Please let me know if there is anyway to amend the TDD right away to bring the ceiling up to \$20K.

Thanks for your help Linda.

Mike,

I added Bill as a co-wam.

Hi Linda.... do I need to do another amendment to the Exxon Mayflower TDD in order to add Bill Rhotenberry as an alternate WAM? If the most recent amendment hasn't gone through yet, is it possible to add an alternate WAM to it?

thanks

Mike

Chris.... do you take care of the SRO justification? I'm unclear about this.... just fyi, the reason we need more money for START is to do all the potential air sampling in the residences.... it's \$1,000 per suma and we are doing at least 3 per house and we will need two more START employees to help implement.

let me know if you need more information.

thanks!

Mike,

Either of the Chris' have done them for OSCs in the field. I haven't seen either of them today, however. I'll go look for them.

can I assume that Petersen or Ruhl do the SRO? or is that something I should do?
